

**BEAM PLUS
A SMALL CONNECTOR CREATES A BIG
DIFFERENCE**

SURGICAL WORKPLACES

Combining a light and pendant, BEAM PLUS creates space on the ceiling for versatile possibilities, such as a patient transfer system or the VARIOP ceiling elements. Due to ease of installation, the construction time and cost of the BEAM PLUS are minimized. It allows for a light or a screen to be installed on the pendant that is as flexible as your own arm,

thus providing the light and the screen with a large action radius. The saving of bedside space and a display at the foot end support the workflow in clinical rooms and helps to reduce the infection risk.

MAQUET – The Gold Standard.

BEAM PLUS EXAMINATION LIGHTS OR SCREENS IN EASY REACH MAQUET – THE GOLD STANDARD

Flexible positioning of the examination light: at the head end...

...or at the foot end.

Let the equipment move: stay on wet side, read data from dry side.

The patient rest is undisturbed by airborne particle and nurses' work.

Patient TV in comfortable reach. Ceiling free for other equipment.

Hygienic cover if future installation of light or screen is desired.

| Combinations | Art. Number | Short Description | Max. Swivel Range | Max. Loading |
|---------------|---------------|-------------------|---|---------------|
| LUCEA 40 | ARDLCA209000C | LCA 40 TUB260 | 1857mm (73.1inch) | n/a |
| SATELITE XS09 | ARD515031450C | SAT XS 0912 | Max. swivel range 2540mm (100inch), max. 9kg (19.8lbs) loading | 9kg (19.8lbs) |
| | ARD515032450C | SAT XS 0913 | Max. swivel range 2690mm (105.9inch), max. 9kg (19.8lbs) loading | 9kg (19.8lbs) |

Technical highlights:

- Minimal capacity reduction for outlets with light and screen use.
- For the detailed light and screen information please refer to SATELITE information material.
