M-LIFTING WORK SAFELY AT YOUR ERGONOMIC HEIGHT MAQUET – THE GOLD STANDARD

MAQUET, leader of medical systems and products for over 170 years, has been setting the standard for sophisticated workplaces in the operating room, Intensive Care Unit and patient transport. The complete medical technology solutions for operating theatres and intensive care units, enhance workflow and optimize patient treatments whilst creating an ergonomic work environment for the personnel.

MAQUET introduces M-LIFTING – the most advanced ceiling supply unit of its kind - to provide both staff and patients with a more aesthetic and ergonomic clinical experience by lifting anesthesia machines and MIS trolley.

MAQUET – The Gold Standard.

M.I.S. pendant:
MODUTEC Power 6-10 with Mobili 1200

Anesthesia pendant: M-LIFTING with FLOW-i

Satellite with monitor arms and PowerLED

Surgical pendant:
MODUTECH LL 6-6 with Mobili 800

M-LIFTING IMPROVED WORKFLOW

■ **User Friendly:** Lift your anesthesia machine or Minimally Invasive Surgical trolley vertically (range of up to 400mm) without creating unwanted horizontal movement and thus avoiding unnecessary re-adjustment.

■ **Ergonomic:** The extremely rigid arm combined with the compact design of the distribution modules and complete integration of gas, electrical sockets and communication ports, optimize your clinical work environment.

■ **Safety:** Two sensor systems with the unique emergency stop, safeguarding the docking and lifting of your equipment with a double level of security.

Technical Data	
Ceiling Structure	Modular ceiling structure available for suspended ceiling depth up to 1200mm (47.24 inches) Welded ceiling structure available for depth between 1200mm (47.24 inches) to 1600mm (62.99 inches)
Beam	600mm (23.62 inches), 900mm (35.43 inches), 1200mm (47.24 inches) and their combinations
Loading Capacity	Maximum loading of docking pins is 200kg, up to 350kg gross loading on the beams
Distribution Module	Console 400 or 600 with lifting system
Rotation Degree	330° for each axis
Lifting Speed	27s (120V) / 36s (230V)
Height Adjustment	400mm (15.75 inches)

M-LIFTING OFF-THE-FLOOR ADVANTAGES

Better Together: While the Endoscopy Trolley allows for MIS equipment to be allocated to an OR wherever and whenever needed, M-LIFTING ensures that high standards in hygienic and ergonomic requirements are still met: with the total set-up lift off the floor, the air circulation in the OR can be improved and cleaning will be facilitated, while room-turnaround times can be shortened. The combined unit is easy to maneuver.

Smart Set-up: Additional equipment such as monitors and IV poles can be mounted to the distribution module and down tube thanks to the system's gross loading of up to 350 kg.
