

Combinea

Hospital bedside cabinet

Combinea – arrange it as you wish

Ranges of Combinea and Combinea Plus bedside cabinets are highly diverse, offering 8 different models each. Such a selection will meet demands of the whole spectrum of customers.

- MODULAR RANGE OF BEDSIDE CABINETS
- EASY INFECTION CONTROL
- SIMPLE TO USE
- SAFE FOR THE PATIENT AND SURROUNDING EQUIPMENT
- LARGE VARIETY OF COLOUR OPTIONS

▪ The ABS plastic upper board of the bedside cabinet is removable thereby perfect for cleaning.

▪ The bumpers around the stand prevent collision of the locker body with room walls.

▪ 50 mm diameter double castors.

Removable plastic organizers can be taken out for easy cleaning. (they feature a partition).

DISTINCT CHARACTERISTICS

- Combinea range presents a functional and elegant solution for the clients' rooms. Cabinets have defined edges and thus can be toned with other modern furniture. Their laminated corpuses feature a metal gallery on top for easy manipulation and handling.
- The range Combinea Plus offers the same variety of models as the previous one. Moreover, it emphasizes the need for safety of the patients and endurance of the cabinets. Bodies of the cabinets have postforming finish which eliminates edges from the patients' environment.

COMMON FEATURES

- The cabinets feature one or two top drawers with removable plastic organizers which facilitate cleaning and help to keep the inside tidy.
- The bottom storage space is approached in three different ways upon customers' preferences: a large drawer with a bottle holder inside or room with a single shelf shut by one full or two half doors. The later can be possibly equipped with a hinge allowing opening up to 270 ° and therefore an easy access toward the cabinet's content.

FURTHER EQUIPMENT

- Both ranges offer models for the most demanding customers – one with the eating board and one with integrated fridge.
- All cabinets are fitted with round, easy to grasp handles with elegant matt silver grey finish.
- Protective bumpers at the bottom of the cabinets prevent an early damage of both the cabinets and the surrounding equipment.
- Being offered in a large variety of uni colors and wooden decors, both ranges give the last touch to any interior.

Protective bumpers at the bottom of the cabinets prevent an early damage.
